

Subject: CPRA request (CD2.2019.07.16.a)

From: [REDACTED]

Date: 7/16/19, 11:01 AM

To: karo.torossian@lacity.org, councilmember.krekorian@lacity.org, sara.ibranossian@lacity.org, yolanda.ramos@lacity.org, mehrin.rahman@lacity.org, anna.aroutiounian@lacity.org, anna.hovasapian@lacity.org, julia.gould@lacity.org

Good morning, CD2.

Today I am looking for

A. emails between CD2 staff or Mr. Krekorian from 2019 and any of the following folks:

1. Charles Dinse -- email address is either 34920@lapd.lacity.org or 34920@lapd.online
2. Fern White (AKA Fern Peskin-White AKA Fern Peskin) -- don't know email address, please search on both "fern white" and "peskin"
3. Eileen Blazi -- don't know email address -- please search on "blazi"
4. Sean Brown -- email address is either 36253@lapd.lacity.org or 36253@lapd.online
5. Duc Dao -- email address is either 34218@lapd.lacity.org or 34218@lapd.online
6. 25831@lapd.online or 25831@lapd.lacity.org
7. 30905@lapd.online or 30905@lapd.lacity.org
8. 35828@lapd.online or 35828@lapd.lacity.org
9. 32740@lapd.online or 32740@lapd.lacity.org
10. don8819@icloud.com
11. don8819@gmail.com

B. Emails in possession of any CD2 staff or Mr. Krekorian from 2019 that contain any of the following search terms:

1. encampment
2. homeless
3. beautification
4. planter

I need copies of these emails in MBOX format, which the City's Gmail system allows each user to export via Google Takeouts. Please note that provision of emails in this format is required by the CPRA at section 6253.9. If you all need help in executing the export procedure you might contact Colin Sweeney of CD12, who has prepared a handy instruction sheet for City email users responding to CPRA requests.

Note that MBOX files are structured text and can therefore be redacted without altering the file format using find/replace in a text editor (NOT a word processor) to replace actually exempt information with innocuous symbols such as ++++++ or something similar. I also need copies of ALL attachments to these emails in their own native formats. These will automatically be included in the MBOX export.

Thank you, Cd2, for your help!
